<b>1.</b> Introduction	page 504
<b>2.</b> Protection elements and supports	page 506
<b>3.</b> Choosing the upholstery color	page 507
<b>4.</b> Dual motor models	page 508
<b>5.</b> Four motor models	page 514
<b>6.</b> Extra large model	page 516
<b>7.</b> Manual relax model	page 517
<b>8.</b> The Back School advices	page 519

*“When we have a moment to relax ourselves, we should avoid sinking into a too soft couch, but rather use an anatomic armchair which may allow us to abandon ourselves and relax our mind. Our spine will benefit greatly since disc pressure is reduced and the physiological shape is maintained.”*  
**Prof. Benedetto Toso - Toso Back School Program (Italy)**

**Sturdiness** is guaranteed by the use of high quality mechanisms and motoring, properly tested and standardized. With poplar or beech frames and plywood, while the armrests are made of particle boards. All screws have thread-locking compound to prevent unscrewing of the parts while moving.

**The padding** is made of high density foam rubber which prevents the change of shape over time. The thickness of the seat and the backrest are different enabling a measured support for the whole body.

**The cover** is made of artificial leather or microfiber. All covers are heavy-wear resistant and the upholstery finishings are high-quality.

**The wheels** enable easy transferring of the armchair on any surface and are highly resistant to static and dynamic stress.

**Personalization** is possible with several accessories. Furthermore, some changes to the measure of the structure, to the thickness of the padding, and the upholstery accessories can be applied providing they are feasible.

**Safety** is guaranteed by the use of motors with a 28V power adapter in accordance with the EU Directive 89/366. The adapter is placed outside the armchair and this reduces the exposure to electromagnetic fields. Last, some armchairs are certified as medical devices too.

**Maximun safety load** may vary according to the different models from a minimum of 110 kg to a maximum of 300 kg, with the Extra Large version.

**The four-motor version** is available for some models to allow not only full independence of the movement of the backrest and the legrest but also to adjust the whole armchair in height and to reach basculamento and Trendelenburg positions. The maximum load is increased up to 150 kg.

**LIFTING ARMCHAIRS**

The mechanical and moving parts of the relax armchairs and aid to lifting of the Chinesport program undergo load and performing tests to ensure reliability and long lasting performance. The guarantee period is three years for all models.

**ERGONOMIC CHARACTERISTICS**

**Height of the seat:**

it allows the elderly to use less energy while getting up, as well as to keep a straight angle for the lower limbs.

**Depth of the seat:**

it avoids the person from sliding forward.

**Height of the backrest:**

it provides a good support at the upper and lower back regions as well as at cervical area while resting.

**Height of the armrests:**

it decreases the pressure on the lower-back spine discs and to loosen the shoulders;

**Tilt while lifting:**

it allows to adopt an upright position with the least effort preventing sliding due to excessive tilt or too much flexion and spinal cord level;

**Position of the legrest in relation to the hip:**

When the legrest is completely raised, the legs are higher than the hip and this creates a lesser pressure on the discs and an easier blood flow.

*The backrest of some armchairs can be removed so they can be transferred easily..*

**DID YOU KNOW THAT...?** Chinesport relax riser armchairs, with two or more motors make it easier to get up and sitting down for those who are impaired in movement. Considering this important feature, as an aid, patients can get advantage of a reduced VAT percentage all along the Italian territory, when a Local Health Care System specialist issues a prescription, and when presenting an invalid certificate issued by an Official Government Institution.

**PROTECTION ELEMENTS AND SUPPORTS**

**01222. ? HEAD PROTECTION**

It is a microfiber cloth which protects the backrest. It is removable so as to be easily cleaned. It is always included in Lucy and July microfiber models.

**01223. ? ARMREST PROTECTION**

They are microfiber covers to protect the armrest, easy to remove and to clean. Always included in Lucy and July microfiber models. Sold in pairs.

**AC0752. ? HAND CONTROL HOLDER**

The hand control can be left at a fixed position during the lifting, and in special way at the completed raising stage. By this way the end user can help himself to get a standing position during the lifting with both arms on the armrests as lever.

**01225. ? CERVICAL CUSHION**

It is a cushion for cervical support which can be adjusted in height. It can be easily removed and cleaned.

**01226. ? CERVICAL U-SHAPE CUSHION**

This cervical support is an important restraint for the head on its sides when needed. It is padded and height adjustable.

**01227. ? LOW-BACK CUSHION**

It is a cushion for the low-back support which can be chosen in the same color of the chair, as well as the other elements considering the upholstery.

**POSTURAL CUSHIONS**

Cushions of different sizes. They are elastic and can change shape, as they always return to the original shape, they are the ideal support for the low back (and lateral) area and the upper and lower limbs. The upholstery is light and washable.

- 01449 POSTURAL CUSHION 100** - ø cm 19 x 17
- 01450 POSTURAL CUSHION 110** - ø cm 19 x 31
- 01451 POSTURAL CUSHION 120** - ø cm 25 x 37
- 01452 POSTURAL CUSHION 8** - cm 40 x 20 x 13 h
- 01453 POSTURAL CUSHION 88** - cm 50 x 28 x 13 h

**01426 POSTURAL SET**

The Postural kit consists of 5 cushions, one of each kind, as shown above, and a carry bag of cm 33 x 33 x 56 h size.

Giotto is the flame retardant fabric made for residential and contract upholstery. Its resistant structure and the easy cleaning make Giotto particularly suitable for hospitals, nursing homes, spas, rehabilitation centers and gyms. Giotto has a leather-effect surface with a brilliant finishing, in a wide range of colors all available on stock. Giotto contains Vinyzene, an anti-microbial agent added in the first steps of the production process. This creates a defensive barrier against mites, bacteria and fungus, avoiding smells and allergies.

## 01230.2 FANNY 2EL

Dual motor riser and relax chair. It has the possibility to adjust the backrest and legrest independently, by means of a low-voltage (28V) hand control. This chair helps the user to adopt a reading posture, for watching television, and for better digesting. It also rises and leans forward for aiding the user while sitting down or getting up. The person can adopt any intermediate position while getting up. Lift is carried out safely thanks to the sturdy frame that rests on the floor and due to a smooth and continuous movement as well. This version allows the backrest to be even more reclined, and the leg rest to be lengthened by further 10 cm in relax and digesting position, it is possible to tilt the chair to raise the legs and improve the blood flow and decrease the pressure on discs. It is provided with a large pockets on the right side and with four swivel casters. The seat and leg rest are made from the same cushion and cover, which ensures a steady and uniform support for the lower limbs. Three-year guarantee period.

**02028. ? TRUDY**

A rest armchair that is manually adjustable by exerting a light pressure on the armrests. In this armchair, the legrest can be lifted first and the backrest can be reclined at a later time. The backrest is balanced by unloading the weight onto the mechanism, so that the user can easily recline the back while keeping the position reached. It is therefore possible to reach a position for reading or relaxing. The backrest is contoured to provide support for a physiological lumbar lordosis, dorsal kyphosis and cervical lordosis. Three-year guarantee period.

**02029. ? TRUDY 2**

This model has the same characteristics as code 02028 but it also includes braked casters for transferring.

The backrest is removable which allows easy storing and transferring.

### 33620.2 FANNY M

A rest armchair that is manually adjustable by exerting a light pressure on the armrests. This chair helps the user to adopt a reading posture, for watching television, and for better digesting. Its width size has been considered so that it can be easily moved around the house. May the client make any special request, it can be customized. It has a right side pocket and four swivel non-marking rubber casters with brakes, for easy transfers. The seat and legrest are made from the same cushion and cover, which ensures a steady and even support for the lower limbs. It can be easily transported thanks to a slide-in system that allows for removing the backrest. Three-year guarantee period.

This model has a removable backrest, for easy transferring.

TECHNICAL SPECIFICATION

#### ARTIFICIAL LEATHER

#### MICROFIBER

The 80% of vertebral ache is not caused by any specific pathology of the spinal cord, but by wrong movements and postures, psychological stress, unfit physical shape, overweight, obesity and smoking habits.

**The Back School advices:**

- always choose positions and movements in which there is a minor pressure on discs;
- keep physiological curves;
- change position frequently;

Alf L. Nachemson has demonstrated that the more reclined the backrest is, the lesser the pressure on the discs. To obtain the best results it is very important the backrest can keep the physiological curves.

The pictures show some examples of different activities which stress the low-back spinal cord. These are the causes of most low-back ache. It is better, then, to avoid repeating the same position when relaxing on the armchair.
