

Be My Eyes for Work

An Accessibility Solution for Your Blind and Low-Vision Employees

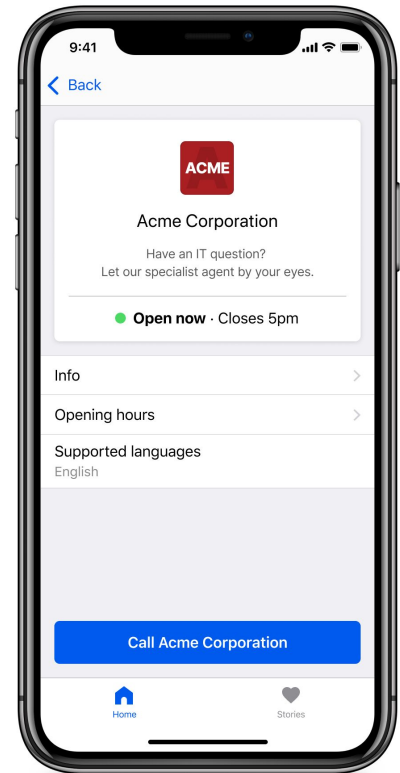

Join the movement of companies around the world who are providing innovative, dynamic accommodations for visually impaired employees

About Be My Eyes for Work

Be My Eyes for Work is an internal communications tool that makes the workplace more accessible for people (employees, students or other members of your organization) who are blind or have a low level of vision by connecting them to their sighted colleagues or support staff who solve company-related issues quickly and remotely over live video. Employees can connect to a large or small group of colleagues with the press of a button through the Be My Eyes app, initiating a video-call with relevant contacts in HR, IT, programmatic staff or other departments to quickly solve tasks that require visual assistance.

How It Works

- 1 Build a custom profile for your organization on the Be My Eyes app that can be accessed exclusively by selected employees
- 2 Select employees from relevant departments within your organization who will be answering calls (human resources, IT, etc.), as well as set hours for when calls can be received
- 3 Sighted support employees may download the Be My Eyes app on their PCs or mobile device
- 4 Blind or visually employees may download the Be My Eyes app on their mobile device and your support will populate automatically
- 5 With the click of a button, users can video-chat with relevant support colleagues, creating instant connectivity and increased efficiency for employees who need visual accommodations

Employee Benefits

Improves employee productivity, independence and job satisfaction

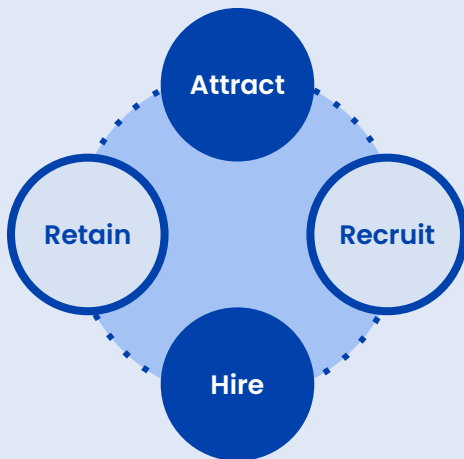

Offers privacy and consultation for low-vision employees seeking help

Ensures an equal opportunity for all employees to succeed

When your blind/low-vision employees log into their Be My Eyes account, they'll have exclusive access to a live video dial-in connected directly with relevant employees of your choosing.

Be My Eyes for Work Adds Value Throughout the Employment Lifecycle

- 1 Partner with Be My Eyes for work and spread the word to stakeholders
- 2 Blind/low-vision job-seekers apply to join your organization using Be My Eyes
- 3 Newly-hired employees receive Be My Eyes profile on Day-1, ensuring all their questions and needs are met
- 4 Employee uses Be My Eyes regularly for daily work-related tasks, including downloading new software, health insurance enrollment, skills training
- 5 Employee productivity, job satisfaction and success goes up
- 6 Employee plans retirement with help of HR through the app
